

Esso Fawley IB2 & MEK 2019 T/A

A look into one of our more recent contracts, Unit Engineers and Constructors completed a highly successful contract for Esso Fawley.

Personnel on site from 3Q 2018 to support scope preparation, building to a full Site Team for Execution, Close Out & QA Handover in Q3 & Q4 2019.
Included Mechanical Support for a minor stage-outage in May 2019, c. 1100hrs.
Facilitated the order to supply 4 x replacement fin-fan bundles.
Peak Manning Level – 78, Total Manhours on Project c. 36,000.
100+ welds completed – zero repairs required.

IB2 Unit – 66 Work Packages Completed: (Now online – Zero Leaks Reported).

- Replacement of 5 x fin-fan bundles and overhaul of 3 other exchangers.
- 12 Piping Repairs
- 35 Valve replacements

MEK Unit – 45 Work Packages Completed:
(Start-Up ongoing – Zero Leaks Reported)

- 9 Exchanger Inspections/Overhauls
- 21 Piping repairs
- 17 valve Replacements
- Repairs carried out to main furnace

With a clean safety record on this contract and over 1 million man hours without a reportable injury, this was a very successful job for Immingham based Unit Engineers and Constructors, with high performing KPIs resulting in total project value being in excess of £2 million.
